How are the School Climate Indicators Calculated?

The school climate indicators provide school-level descriptions of several factors that are known to influence learning success in schools. All subdomains except "Low Violence Victimization" are calculated by averaging the percentage of respondents who report "Yes, most of the time" or "Yes, all of the time" on survey items that comprise each scale. "Low Violence Victimization" is computed by averaging the percentage of respondents who report "No, never" on the survey items that comprise the scale. A value of 60 on the "School Connectedness" indicator, for example, means that on average, students report "Yes, most of the time" or "Yes, all of the time" on three of the five "School Connectedness" survey items (5 multiplied by 60 percent).

All subdomains and survey items that comprise the scales/measures are listed below.

- (1) School Connectedness (5 items)
 - o Do you feel close to people at/from this school?
 - o Are you happy to be at/with this school?
 - o Do you feel like you are part of this school?
 - o Do teachers treat students fairly?
 - o Do you feel safe at school?
- (2) Academic Motivation (4 items)
 - o Do you finish all your school assignments?
 - o When you get a bad grade, do you try even harder the next time?
 - o Do you keep working and working on your schoolwork until you get it right?
 - o Do you keep doing your schoolwork even when it's really hard for you?
- (3) Caring Relationships (3 items)
 - o Do the teachers and other grown-ups at school care about you?
 - o Do the teachers and other grown-ups at school listen when you have something to say?
 - o Do the teachers and other grown-ups at school make an effort to get to know you?
- (4) High Expectations (3 items)
 - o Do the teachers and other grown-ups at school tell you when you do a good job?
 - o Do the teachers and other grown-ups at school believe that you can do a good job?
 - o Do the teachers and other grown-ups at school want you to do your best?
- (5) Meaningful Participation (7 items)
 - o Are you given a chance to help decide school activities or rules?
 - o Do the teachers and other grown-ups at school ask you about your ideas?
 - o Do the teachers and other grown-ups give you a chance to solve school problems?
 - o Do you get to do interesting activities at/when you participate in school?
 - o Are you given a chance to help decide class activities or rules?
 - o Do your teachers ask you what you want to learn about?
 - o Do you do things to be helpful at school?
- (6) Perceived School Safety (1 item)
 - o Do you feel safe at school?

(7) Low Violence Victimization (3 items)

- o Do other kids hit or push you at school when they are not just playing around?
- o Do other kids at/from school spread mean rumors or lies about you?
- o Do other kids at/from school call you bad names or make mean jokes about you?

(8) Fairness (4 items)

- o Do teachers treat students fairly?
- o Are the school rules fair?
- o Do teachers and other grown-ups at school treat students with respect?
- o Are students treated fairly when they break school rules?

(9) Rule Clarity (1 item)

o Do students know what the rules are?

(10) Social Emotional Learning Supports (4 items)

- o Does your school help students resolve conflicts with one another?
- o Does your school teach students to understand how other students think and feel?
- o Does your school teach students to feel responsible for how they act?
- o Does your school teach students to care about each other and treat each other with respect?

(11) Antibullying Climate (3 items)

- o Do the teachers and other grown-ups make it clear that bullying is not allowed?
- o If you tell a teacher that you've been bullied, will the teacher do something to help?
- o Do students at/from your school try to stop bullying when they see it happening?

(12) Positive Behavior (4 items)

- o Do you follow the classroom rules?
- o Do you follow the playground rules at recess and lunch times?
- o Do you listen when your teacher is talking?
- o Are you nice to other students?

(13) Parent Involvement in Schooling (5 items)

- o Does a parent or some other grown-up at home care about your schoolwork?
- o Does a parent or some other grown-up at home ask if you did your homework/schoolwork?
- o Does a parent or some other grown-up at home check your homework/schoolwork?
- o Does a parent or some other grown-up at home ask you about school?
- o Does a parent or some other grown-up at home ask you about your grades?

(14) Facilities Upkeep (1 item)

o Is your school building neat and clean?

Results are based on responses from 5th grade students on the California Healthy Kids Survey. Student results are not included if less than 50% of students or less than 15 respondents provided data.

For the 2020-21 school year, results on student indicators that are only applicable to the In-school or Hybrid instructional models are reported if at least 10% of the respondents have indicated that they

attended school in person or participated in hybrid classes. These results should be interpreted cautiously if few students attended school in person when the survey was administered.

Further information about the methodology used to construct the school climate indicators can be obtained by contacting Cindy Zheng at 562-799-5481 or czheng@wested.org.

State Averages

State averages are based on responses from 5th grade students who provided data on the California Healthy Kids Survey during the 2021-2022 and 2022-2023 school years.

How are the Mental Health Indicators Calculated?

"Frequent Sadness" is measured by the percentage of students who report feeling sad most of the time or all of the time. "Wellness" is assessed by the percentage of students who report that they feel good and happy most of the time or all of the time.

The survey items are listed below.

- (1) Frequent Sadness (1 item)
 - o Do you feel sad?
- (2) Wellness (1 item)
 - o Do you feel good and happy?

Results are based on responses from students in 5th grade on the California Healthy Kids Survey.

Results are not included if less than 50% of students or less than 15 respondents provided data at the school or district.

Further information about the mental health indicators can be obtained by contacting Cindy Zheng at czheng@wested.org.

This report provides the detailed results for each question from the 2024-25 California Healthy Kids Survey (CHKS) for schools within this school district. The CHKS, along with its two companion surveys—the California School Staff Survey (CSSS) and the California School Parent Survey (CSPS)—form the California Department of Education's California School Climate, Health, and Learning Survey (CalsCHLS) System. CalsCHLS is the largest, most comprehensive state effort in the nation to regularly assess students, staff, and parents to provide key data on school climate and safety, learning supports and barriers, stakeholder engagement, and youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major domains and constructs assessed by CalsCHLS. The Appendix lists the schools that administered the survey in the district and their response rates.

These surveys grew out of the California Department of Education's (CDE) commitment to helping schools create more positive, safe, supportive, and engaging environments and to promoting the successful cognitive, social, emotional, and physical development of all students. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the CalSCHLS website (<u>calschls.org</u>). The California Safe and Supportive Schools website (<u>ca-safe-supportive-schools.wested.org</u>) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS technical advisor team offers data workshops and coaching to help identify local needs and develop action plans to meet those needs.

THE SURVEY

CDE has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention, and health programs.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The elementary school CHKS consists of a required general Core Module and a series of optional, supplementary topic-focused modules, including a Social Emotional Health Module (SEHM) and Mental Health Supports Module, that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As outlined in Exhibit 1, the Core Module consists of key questions that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, positive development, and well-being. The primary focus of the survey is assessing student perceptions and experiences related to:

- school climate, connectedness, and learning engagement;
- perceived school safety and frequency of, and reasons for, harassment and bullying at school;
- developmental supports (protective factors) that promote positive academic, social, and emotional outcomes: experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school;
- mental health, supports for social-emotional learning, and positive behavior; and
- health-related and behavioral learning barriers (e.g., substance use, violence at school, physical health, mental health).

Social Emotional Health Module (Supplementary)

The Social Emotional Health Module (SEHM) greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-emotional competencies linked to student mental health and well-being, academic success, and life satisfaction. It includes 39 items that capture core adolescent psychological assets. The combination of the SEHM and Core Module yields a comprehensive set of data to inform decisions about mental health and social-emotional learning programs.

Mental Health Supports Module (Supplementary)

The Mental Health Supports Module (MHSM) assesses students' mental health, openness to utilizing mental health supports and services, and access to mental health services at school and elsewhere. This 12-item module was developed by the University of California, San Francisco Institute for Health Policy Studies.

SURVEY ADMINISTRATION AND SAMPLE

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Student participation was voluntary, anonymous, and confidential.

- Table A1.1 gives the target sample of students and the final number and percentage of students who completed the survey (the participation response rate).
- The Appendix lists all the elementary schools in the district that were eligible to participate in the survey and the percentage of students enrolled in each of them that completed the survey.

THE REPORT

The report tables, organized by topic, provide the percentage of students that responded to each question response option. Percentages are rounded to the nearest whole number.

Race/Ethnic and Gender Results

Summary tables provide key findings (e.g., safety, harassment, developmental supports, school connectedness) disaggregated by race/ethnic categories and gender. Districts can subscribe to the District CalSCHLS data dashboard to disaggregate their CHKS results by the race/ethnicity or gender of students or by other demographic categories.

ONLINE DATA DASHBOARDS

Public Dashboard. Anyone can examine online key state, county, and district CHKS results on the public CalSCHLS Data Dashboard (<u>calschls.org/my-surveys</u>). The dashboard can be used to graphically display statewide, county, and district key indicators and item-level results, trends over time, and differences in survey outcomes by race/ethnicity, gender, afterschool program participation, and other characteristics. In addition to displaying results interactively on the web, dashboard results can be exported as Image and PDF files for dissemination. District data are publicly posted on the dashboard by the end of November of the year following survey administration.

The District Dashboard Option. Districts may also purchase a two-year subscription to a password-protected, private data dashboard that displays up to 11 years of CalSCHLS data at not only the district level but also the individual school level. The dashboard provides designated staff with graphical data displays for the district as a whole, for all schools in the district on the same page to enable comparisons across schools, and for a single, individual school. At both the district and school level, viewers can:

- compare their data with district and state averages;
- make comparisons by gender, race/ethnicity, afterschool participation, and other characteristics; and
- examine data trends over time overall and by different demographic groups.

Viewers at both the district level and the school level have the option to download data displays as a PDF document which can be shared with stakeholders.

UNDERSTANDING AND USING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. These include changes that occur in survey content, administration, and/or sample characteristics between administrations. The following are a few of the key issues that should be kept in mind.

Representativeness

Among the most important factors affecting the quality of survey results is the level of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70 percent (see Table A1.1 and Appendix I for student response rates). Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of students who completed the survey, changes in the

questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

<u>CalSCHLS.org</u> contains numerous guidebooks and other resources for using and understanding survey results.

- CHKS **factsheets** analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level (calschls.org/resources/factsheets).
- *Making Sense of School Climate* provides a discussion of CalSCHLS survey items that relate to school climate (data.calschls.org/resources/S3 schoolclimateguidebook final.pdf).
- The California Center for School Climate (<u>ccsc.wested.org</u>) website houses school climate resources and guides, and archived virtual events.
- The *California Safe and Supportive Schools Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on <u>ca-safe-supportive-schools.wested.org/subscribe/</u>.
- CDE's California Safe and Supportive Schools website (<u>ca-safe-supportive-schools.wested.org</u>) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.
- The CalSCHLS Item Crosswalk (<u>calschls.org/resources/#resources and tools</u>) is a handy table listing all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found, to assist in the comparison of findings among students, staff, and parents.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous improvement. The following describes some additional steps you should take and some custom services (additional fees apply) available from the CalSCHLS technical advisor team. These will help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

Engage students, parents, and school/community stakeholders in reviewing and exploring the meaning of the results. Obtain their input into how the school might better meet the identified school and student needs and into developing a detailed action plan to guide school/community collaborative efforts. This communicates to stakeholders that you value their input into how to improve the school/community and gives them an opportunity for meaningful participation. By enlisting their collaboration, you also increase the prospect that the identified needs will be successfully addressed.

As part of this process, WestEd staff can facilitate a *Data Workshop* designed to identify local needs based on the survey results and engage adult stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS technical advisor (calschls.org/contact) or email calschls@wested.org.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the context of the following sources of related data.

- Staff and Parent Surveys. If your school district has administered the CalSCHLS school staff and parent surveys, obtain these results and compare them to those provided by students. It is important to determine how consistent are student, staff, and parent perceptions and experiences. To facilitate these comparisons, the CalSCHLS Survey Item Crosswalk (calschls.org/resources/#resources_and_tools) lists all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found. If your district did not administer these companion surveys, urge them to do so next time.
- Secondary CHKS Results. Examine how the results for 5th graders compare with those for 7th, 9th, and 11th graders if your district also administered the CHKS at these school levels. The elementary, middle, and high school surveys contain common indicators that will enable you to gain a sense of the developmental trajectory in these indicators and explore what programs at the elementary and middle school levels might help mitigate problems that are evident among older students.
- Other Data. Examine how the results compare with other youth data collected within the district that relate to the variables assessed. Other relevant school-related data include discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.
- Similar District and Statewide Results. The aggregated results from the 2021-2023 statewide CHKS elementary survey administration can be downloaded from the CalSCHLS website (calschls.org/docs/statewide_2123_elem_chks.pdf) to help interpret your results. If there is a school district that you consider similar to your own, you can also check to see if they have administered the survey and download the results for comparison (calschls.org/reports-data/search-lea-reports). How you compare to state and district results can provide some context for your results, but the most important consideration is what your own results say about the students in your school/community.

Data Workshop

To assist in your review of the survey results, you can request your CalSCHLS technical advisor to conduct a structured, customized *Data Workshop*. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS technical advisor (calschls.org/contact) or email calschls@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services are available to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports and School Climate Report Cards

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school. Two types of reports are available:

- A full report with all the survey results
- A short, user-friendly, graphic **School Climate Report Card** that provides trends across key indicators of school climate and provides two-year state averages on those indicators (calschls.org/reports-data/#slcr).

Disaggregated Reports

CalSCHLS staff can produce reports that show how results vary by subgroups. For example, what are the characteristics of youth who are low in perceived safety, school connectedness, or academic motivation compared to those who are high? This is particularly important given the LCAP requirements to address these needs. This helps in understanding the meaning of the results and developing interventions that target groups most in need.

Additional Analysis of Data

The complete dataset is available electronically for additional analysis (<u>calschls.org/reports-data</u>). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of students and across schools within a district. You can also request an analysis by WestEd staff of any topic of interest.

Add Questions to Your Next Surveys

Determine what additional information is needed to guide school improvement efforts and add questions to your next CHKS, staff, or parent surveys. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about survey planning or technical assistance in understanding survey results and developing effective action plans to address identified needs, call the CalSCHLS helpline (562.799.5460) or email calschls@wested.org.
